

TransTel DK-6 Series Digital Telephone Sets

DK6-36D

DK6-18D

The power to communicate effectively with customers starts right at the desktop.

TransTel's DK6 Digital Series Telephone Sets deliver superior performance at an affordable price.

The DK6 incorporates a high quality speakerphone for conferences and hands free telephone calls.

There is a built in headset jack in every telephone for those needing use of both hands while speaking to clients.

The telephones include a multi position desk stand so you may adjust the telephone to the angle most suitable to your preferences.

Hot Dialpad means you do not have to press an intercom button before making a call.....just start dialing.

Feature access is a breeze.....all you have to do is press a button, keeping you productive and away from cumbersome user guides.

Flexible keys allow you to set up the phone the way you want.....features, speed dials, redial, outside lines.....all at your finger tips!

Intuitive LCD displays give you valuable system information and enable features like Caller ID and messaging....both voice and text.

We're serious about your communications which is why we put the power to be your best right at your fingertips.

Intuitive & Productive Business Telephone Sets

TransTel DK-6 Series

1. A large and clearly visible red LED flashes to let you know when a call is coming in or you have a message.
2. The LCD display provides information like Caller ID, calling station display, outside line display as well as feature status. A contrast control is also provided.
3. Frequently used feature keys such as message waiting, caller id and conference are provided on the top row.
4. Up to 30 keys are available to be customized for your use. These flexible keys can be used for features, one touch access to other stations, speed dials or outside lines.
5. Dual color LED's are provided for easy identification of outside line status. Green always means it's your call and red indicates it is another user's call.
6. Redial let's you dial a number repeatedly by pressing a single key.
7. Speed Dial- Conveniently access hundreds of numbers from the system speed dial directory
8. Use the MIC/AT key to listen without being heard while on the handset or hands free or to eliminate background noise. In the idle mode use this key to control Auto Answer on internal calls.
9. Use the speaker key to terminate a call in the hands free mode without having to lift up and replace the handset. You may also switch from handset to hands free using the speaker key.
10. Press the Hold key to place a caller on hold.
11. The VOL up and down bar allows easy adjustment of ringer, handset and speaker volume.
12. Send voice announced calls to other station users using the Transfer/Flash key and well as transfer outside callers to cell phones of fellow employees.
13. Hot Dial pad means you can just go ahead and start dialing without lifting the handset or pressing an intercom key.
14. The speaker provides quality audio for hands free calls, group listening, paging and background music while at your work station.
15. A reversible handset clip for wall mount applications.
16. A headset jack is provided as a standard feature on every DK6 model
